**Game Notes:**

First game of the 2015-2016 Season versus AC Miami U12/13/14 recreational club in our local area. The field conditions and weather conditions were adverse to the normal conditions we are used to. The grass was high and heavy, the goals were not regulation size, and the heat and humidity were above average. Playing with the field and weather conditions plus our adversary being older and bigger than us made this a great challenge to test the players. We played well tactically being well positioned defensively in the first half as well as playing out the back consistently. Towards the middle of the first half until the end of the game our physical conditioning affected our performance as we could not cope with the weather, field, and the size of the opposing team. In general however despite the conditions we played a very strong game for it being the first one of the season and we missed countless chances to score more goals since we also dominated most of the game. Special mention to Gianluca Ripamonti who had a strong performance defensively in CB and LB.
